

Issue	Sub-issue	Feedback Comment	Site #	Sentiment	Community wants
Housing & the built environment	Location	I don't think this site would be an issue for accessing village services. It's not far to walk and these are clearly the best sites.	136	Positive	
Infrastructure & Access	Footpaths/Cycleways	These would be the least disruptive of all options. However, I feel that the public footpath access would need to be improved to encourage residents to walk to town.	136	Positive	
Housing & the built environment	Location	Best access - better location than central village.	136	Positive	
Housing & the built environment	Scale of development	Far too high density. Access proximity to junction not ideal but may be acceptable if small numbers.	136	Negative	
Housing & the built environment	Location	Too close to: Historic listed buildings, too narrow access, reduction of aesthetic environment.	136	Negative	
Housing & the built environment	Location	Development on the outskirts better than losing "space" in the rest of the village.	136	Positive	
Infrastructure & Access	Traffic congestion/Parking	Already have to queue to turn into Odell in the mornings due to parked cars - more congestion likely.	136	Negative	
Other	General	Owner sold and moved away?	136	Neutral	
Housing & the built environment	Location	Development should be on outskirts of village. Preferable to central development.	136	Negative	
Infrastructure & Access	Traffic congestion/Parking	Good infrastructure and will not congest centre of village.	136	Positive	
Infrastructure & Access	Access constraints	Better access than to other potential sites.	136	Positive	
Infrastructure & Access	Access constraints	Yes. Better access and won't impact on middle of village. Small affordable houses.	136	Positive	
Community facilities	Community wants	Would be a great site for an activity centre.	136	Positive	Activity centre
Infrastructure & Access	Access constraints	No access via Brook Lane	137	Negative	
Infrastructure & Access	Access constraints	Terrible access!	137	Negative	
Infrastructure & Access	Traffic congestion/Parking	Already poor parking in Brook Lane for existing houses.	137	Negative	
Community facilities	Protecting existing facilities	Playground and tennis courts need to be retained. Important part of village life.	137	Neutral	
Infrastructure & Access	Access constraints	Very poor road access. Poor planning! No room downside of village hall.	137	Negative	
Housing & the built environment	Type/Mix Dwelling type	Flats are no good for retired people - they need one level.	137	Negative	
Infrastructure & Access	Traffic congestion/Parking	Ensure that the character is not taken out of Brook lane with additional traffic. Get a lot of walkers and people visiting to see the lane.	137	Neutral	
Community facilities	Protecting existing facilities	Please keep tennis courts!	137	Neutral	
Infrastructure & Access	Access constraints	I would largely support this but new access is questionable. Already a busy junction and utilised bus stop, turning and parking area. Where would those requirements be met? Great for older people (central) but tennis court layout may need revision.	137	Negative	
Housing & the built environment	Design etc	Modern style - smaller floor area over 2/3 levels overlooking existing housing.	137	Neutral	
Other	General	I feel like it's going on holiday every time I come home. Don't want lots of people damaging the feel of that. Top 100 villages in the Times, don't want to lose that.	137	Negative	
Community facilities	Protecting existing facilities	Please keep the playground as it is a great view of the horses! Houses will block them out.	137	Neutral	
Infrastructure & Access	Traffic congestion/Parking	16 flats and 13 car spaces? Extra traffic next to playground. Where do the walkers park?	137	Negative	
Housing & the built environment	Type/Mix Dwelling type	Any central development should be for those with mobility issues who would not be able to live on the peripheral sites. Eg Sheltered housing/retirement/those with no cars, as far as possible.	137	Neutral	
Housing & the built environment	Design etc	We should not have monolithic buildings in the village.	137	Negative	
Other	General	Current work at Harrod Centre is ongoing - who has asked the centre trustee if houses can be built here!	137	Negative	
Local economy	Services	What about services vs size of village. Enough school places, doctors as a percentage of population.	137	Neutral	
Infrastructure & Access	Traffic congestion/Parking	No. It's hard enough to get into Brook Lane as it is. This would generate lots of traffic.	137	Negative	
Housing & the built environment	Type/Mix Dwelling type	How many village pensions can afford a retirement flat?	137	Negative	
Other	General	Good idea.	137	Positive	
Infrastructure & Access	Access constraints	Access, access, access problem.	137	Negative	
Other	General	Vital for older residents to remain in the village.	137	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Good idea as long as this is balanced in wider plan with homes for young people and young families.	137	Positive	
Infrastructure & Access	Access constraints	Brook Lane already pinch point onto High St.	137	Negative	
Infrastructure & Access	Access constraints	The traffic issue here is big. School traffic is bad already having people turning in and out of this access would add to the problem.	137	Negative	
Community facilities	Protecting existing facilities	Playground must be preserved.	137	Neutral	
Housing & the built environment	Scale of development	Looks very cramped and shoe-horned.	137	Negative	
Community facilities	Protecting existing facilities	Please ensure all sporting facilities, including the tennis courts, are retained.	137	Neutral	
Infrastructure & Access	Access constraints	No access via Brook Lane	138	Negative	
Infrastructure & Access	Access constraints	Brook lane is too narrow. Congestion issues. The green space links the village for walks and should be preserved.	138	Negative	
Environment & Countryside	Trees	Vital to protect trees, hedges and boundaries.	138	Neutral	
Infrastructure & Access	Access constraints	I don't see much wrong with this as long as the developer pays good money for access.	138	Positive	
Housing & the built environment	Location	This field an children's play area are well used and accessible for young parents an children. Bulding new homes is important but other sites are more suitable.	138	Negative	
Environment & Countryside	Open space - Protection	This proposal would result in the loss of more open space in and increasingly congested area of the village.	138	Negative	
Environment & Countryside	Open space - Protection	This green space in the village should be protected - enough has been lost already.	138	Negative	
Infrastructure & Access	Access constraints	Dead in the water. Access area not available.	138	Negative	
Infrastructure & Access	Access constraints	Road access would be so dangerous as no clear vision.	138	Negative	
Housing & the built environment	Type/Mix Dwelling type	Must be affordable but good idea generally.	138	Positive	
Infrastructure & Access	Traffic congestion/Parking	Brook lane is already congested with parked cars. So more cars from new housing is not desirable.	138	Negative	
Infrastructure & Access	Traffic congestion/Parking	There must be parking provision for new residences, taking into account that families has more than 1 car.	138	Neutral	
Environment & Countryside	Open space - Protection	Spoil open feel of vilage and access issues.	138	Negative	
Infrastructure & Access	Traffic congestion/Parking	Traffic implications here: Access difficult, amount of traffic increase (eg carers), deliveries, all types inc supermarkets etc! This is already noticeable.	138	Negative	
Infrastructure & Access	Traffic congestion/Parking	How will Brook lane cope with more traffic?	138	Negative	
Environment & Countryside	Trees	Will the tall trees and mature hedges be protected?	138	Neutral	
Infrastructure & Access	Access constraints	Brook lane very narrow, access could still be an issu - where? Across playground?	138	Negative	
Housing & the built environment	Scale of development	Apart from the issue of traffic in Orchard Lane, this site has the sensible balance of size of otherwise dead land.	139	Positive	
Infrastructure & Access	Access constraints	Bad access to Orchard Lane	139	Negative	
Housing & the built environment	Location	I will be mortified if Orchard Lane is used to develop more housing. Massive mistake!	139	Negative	
Housing & the built environment	Location	Good use of poor land, better than building on productive arable land.	139	Positive	
Housing & the built environment	Location	A real shame to fill in all the gaps.	139	Negative	
Environment & Countryside	Trees	Orchard Lane access is very poor. Important to retain mature trees to retain character of area.	139	Negative	
Infrastructure & Access	Access constraints	Too much of an issue with traffic. Orchard lane too narrow. Protect the trees! Would be good to leave this last bit of green space in the village.	139	Negative	
Infrastructure & Access	Traffic congestion/Parking	Access and congestion a key issue. This option does not seem to make as much sense as others. Will impact vilage as more central than other options.	139	Negative	
Infrastructure & Access	Access constraints	Terrible access issues - not least when bulding these dwellings.	139	Negative	
Infrastructure & Access	Access constraints	Orchard Lane too narrow an busy enough.	139	Negative	
Housing & the built environment	Location	Too close to historic listed buildings. Too narrow road access. Too close to heart of vilage.	139	Negative	
Environment & Countryside	Open space - Protection	The vilage is characterised by these pockets of space.	139	Negative	
Environment & Countryside	Open space - Protection	The character of the vilage will be lost if all the green space is filled in.	139	Negative	
Infrastructure & Access	Access constraints	Access to any new developments via current lanes is abad idea as current access is not good and getting more dangerous due to inconsiderate parking.	139	Negative	
Housing & the built environment	Type/Mix Dwelling type	I would support this site as housing for older residents only ue to character of area and proximity to vilage centre. Only problem with Orchard Lane is width and lack of pavement at High St end.	139	Positive	
Housing & the built environment	Scale of development	Too high density.	140	Negative	
Infrastructure & Access	Access constraints	Orchard Lane has listed historic buildings to protect. It is too narrow an congested.	140	Negative	
Infrastructure & Access	Access constraints	Orchard Lane too busy and narrow enough.	140	Negative	
Infrastructure & Access	Access constraints	Orchard Lane is too narrow for access.	140	Negative	
Other	General	Loose rural feel.	140	Negative	
Housing & the built environment	Location	Please consider expansions on the outskirts of Harrold. Building in Orchard Lane is a huge mistake. We want to: Minimise disruption, allow better access, keep congestion down.	140	Negative	
Infrastructure & Access	Access constraints	Roads too narrow.	140	Negative	
Infrastructure & Access	Access constraints	How on earth would lorries turn up Orchard Lane via the butchers? Not possible!	140	Negative	
Infrastructure & Access	Access constraints	Orchard Lane is too narrow for access as it is. Day-to-day traffic, let alone bulding development traffic is unsustainable here.	140	Negative	
Housing & the built environment	Location	Development better in existing vilage. Protects rural setting.	140	Positive	
Infrastructure & Access	Access constraints	Orchard Lane too narrow to service more vehicles.	140	Negative	
Infrastructure & Access	Access constraints	Yes, easy option and infrastructure developed already	141	Positive	
Housing & the built environment	Design etc	Site acceptable, although should have been for business. Could be nice of development continued stable/barn of buildings behind Paul Young.	141	Positive	
Housing & the built environment	Location	Make sense. Agree!	141	Positive	
Housing & the built environment	Location	Yes, clear opportunity.	141	Positive	
Local economy	Type of development (eg Small bu	Ideal for small business	141	Positive	
Local economy	Type of development (eg Small bu	Site is designated for business development (not housing)	141	Negative	
Housing & the built environment	Location	No problem with this. Seems obvious development.	141	Positive	
Infrastructure & Access	Traffic congestion/Parking	This would be much better as a car park to get some of the cars off the High St	141	Neutral	
Housing & the built environment	Location	ok	141	Positive	
Local economy	Type of development (eg Small bu	What happened to the small business units that were originally planned for this space? That idea should be considered.	141	Negative	
Local economy	Type of development (eg Small bu	Small business units	141	Negative	

Housing & the built environment	Type/Mix Dwelling type	Would be better as a small block of apartments	141	Negative	
Housing & the built environment	Type/Mix Dwelling type	Better for flats	141	Negative	
Infrastructure & Access	Traffic congestion/Parking	Good place for parking for shops	141	Positive	
Local economy	Type of development (eg Small bu	Must be kept as business units	141	Negative	
Infrastructure & Access	Traffic congestion/Parking	This would be an ideal site for additional car parking provision (Bathly needed for Co-op shoppers etc)	141	Negative	
Local economy	Type of development (eg Small bu	Was supposed to be small business units originally? Couldn't it still be?	141	Negative	
Local economy	Type of development (eg Small bu	Better for business use as originally planned	141	Negative	
Infrastructure & Access	Services (Drainage etc)	Please could we have a large phone mast in the centre to boost phone signal	141	Neutral	
Local economy	Type of development (eg Small bu	Make landowners build existing "Planned" business units next to Coop. Don't give in and let housing be built there.	141	Negative	
Housing & the built environment	Location	Together with 143 these would create a large housing estate separate from Harrold that would impact adversely the nearer villages of Odell and Little Odell	142	Negative	
Housing & the built environment	Location	I don't think this site would be an issue for accessing village services. It's not far to walk and these are clearly the best sites.	143	Positive	
Housing & the built environment	Location	Together with 142 these sites would create a large housing estate separate from Harrold that would impact adversely the nearer villages of Odell and Little Odell	143	Negative	
Housing & the built environment	Location	Ideal to spread out of village	143	Positive	
Housing & the built environment	Location	Integrity of the village should be protected building on the periphery is the only way to do this I think	143	Positive	
Housing & the built environment	Location	Optimum location least disruption and loss of amenity for villagers	143	Positive	
Housing & the built environment	Location	Access looks better than village centre proposals but too far for old people to walk. Better for families	143	Positive	
Infrastructure & Access	Traffic congestion/Parking	Too far too walk to village - will encourage cars	143	Negative	
Infrastructure & Access	Footpaths/Cycleways	Better access between existing dwellings	143	Neutral	
Housing & the built environment	Location	Too far out of the village for old people's housing	143	Neutral	
Infrastructure & Access	Access constraints	This option has clear access and substantial road/less impact centrally	143	Positive	
Infrastructure & Access	Traffic congestion/Parking	Not good site for keeping traffic out of village	143	Negative	
Infrastructure & Access	Footpaths/Cycleways	These would be the least disruptive of all options. However, I feel that the public footpath access would need to be improved to encourage residents to walk to town.	143	Positive	
Housing & the built environment	Location	Too far out of the village for elderly people. Ok for more houses.	143	Neutral	
Environment & Countryside	Wildlife	The development would spoil a lovely area of countryside and impact the lake and the local wildlife that is attracted to it because of th surrounding fields.	143	Negative	
Environment & Countryside	Wildlife	No development outside village boundary. Also bad for designated wildlife site.	143	Negative	
Housing & the built environment	Type/Mix Dwelling type	Too isolated for old people's homes.	143	Negative	
Housing & the built environment	Type/Mix Dwelling type	Good idea of smaller homes for families to walk in.	143	Positive	
Community facilities	Community wants	Good infrastructure on outskirts of village. Please include playground!	143	Neutral	Playground
Housing & the built environment	Location	A very sensible location for new housing.	143	Positive	
Housing & the built environment	Location	This will not help with issues such as public transport etc as is isolated.	143	Negative	
Other	General	Good idea!	143	Positive	
Environment & Countryside	Open space - Protection	Water run-off and flood risk managements.	143	Negative	
Infrastructure & Access	Traffic congestion/Parking	Great, will ease traffic in village	143	Positive	
Housing & the built environment	Type/Mix Dwelling type	A lovely location for expensive houses to be purchased by outsiders who will add nothing to the community apart from additional traffic as they drive their children to school.	143	Negative	
Housing & the built environment	Location	Best location to protect village and gives reasonably good access and transport.	143	Positive	
Infrastructure & Access	Traffic congestion/Parking	Think of the traffic problems in the High St if families with children take the children to school from the Odell Road.	143	Negative	
Housing & the built environment	Location	I don't think this site would be an issue for accessing village services. It's not far to walk and these are clearly the best sites.	482	Positive	
Infrastructure & Access	Footpaths/Cycleways	These would be the least disruptive of all options. However, I feel that the public footpath access would need to be improved to encourage residents to walk to town.	482	Positive	
Housing & the built environment	Location	Sure this would be a flooding issue	482	Negative	
Infrastructure & Access	Access constraints	Better choice because of better access	482	Positive	
Housing & the built environment	Scale of development	Low density (expensive) for people who don't want to be part of the community. Beautiful piece of countryside with public footpaths to be destroyed by the Chelsea tractor brigade.	482	Negative	
Infrastructure & Access	Access constraints	I strongly feel the 2 sites on the Odell Road and beyond would be preferable - particularly because of access. They would also lessen the danger of imposing overcrowding on the detailed structure of the village centre- again because of limited access in very narrow lanes	554	Positive	
Housing & the built environment	Scale of development	Why do we need a great big field of solar panels. In Italy they have small collections here and there. Also car parks etc with just roofs above of panels.	554	Negative	
Environment & Countryside	Sustainable energy	Still a good idea	554	Positive	
Environment & Countryside	Sustainable energy	Good plan	554	Positive	
Environment & Countryside	Sustainable energy	We need to make an effort to make Harrold a sustainable community - solar power should be part of this	554	Positive	
Housing & the built environment	Location	Strongly feel this is not a appropriate site for a solar farm	554	Negative	
Housing & the built environment	Location	Trust this to rear its ugly head. A solar farm here is absurd.	554	Negative	
Housing & the built environment	Type/Mix Dwelling type	Solar farm or houses?	554	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Solar farm better than housing - less infrastructure	554	Positive	
Environment & Countryside	Sustainable energy	Surely all new industrial units and housing should have solar panles installed naturally	554	Positive	
Infrastructure & Access	Traffic congestion/Parking	Solar farm or housing? A great idea, too much traffic in village	554	Positive	
Environment & Countryside	Sustainable energy	Yes. Solar farm.	554	Positive	
Environment & Countryside	Sustainable energy	Is this up for discussion again? If so, yes.	554	Positive	
Housing & the built environment	Location	Much better solar farm than housing - too far from the village	554	Positive	
Environment & Countryside	Sustainable energy	Yes, good idea	554	Positive	
Housing & the built environment	Type/Mix Dwelling type	Prefer solar farm than housing - more suitable	554	Positive	
Environment & Countryside	Sustainable energy	We voted on this already	554	Neutral	
Environment & Countryside	Sustainable energy	Eco housing with solar heating preferable. The village has already rejected the solar farm idea. Is not a referendum decision binding?	554	Negative	
Environment & Countryside	Sustainable energy	Good idea	554	Positive	
Environment & Countryside	Sustainable energy	Agricultural land and Solar Farm would be thin end of the wedge	554	Negative	
Environment & Countryside	Sustainable energy	We need sustainable energy. Excellent idea.	554	Positive	
Housing & the built environment	Location	I believe this is the site for a solar farm already rejected. Not against solar farms per se, but not bordering a main road. Is prett well hidden from passing view	554	Negative	
Housing & the built environment	Design etc	Too close to green space links for walkers and visual eyecore	554	Negative	
Environment & Countryside	Sustainable energy	Solar energy is the future and could benefit the village	554	Positive	
Local economy	Type of development (eg Small bu	Yes, good idea, especially if village get some benefit. Is money back for the community	554	Positive	
Housing & the built environment	Type/Mix Dwelling type	Yes to solar farm.	554	Positive	
Other	Type/Mix Dwelling type	No to solar farm.	554	Positive	
Infrastructure & Access	Access constraints	Access from Orchard or Brook Lane would create a real traffic issue. These streets are too narrow	579	Negative	
Infrastructure & Access	Access constraints	Poor access - unsuitable site	579	Negative	
Infrastructure & Access	Access constraints	Orchard Lane and Brook Lane far too small to provide access	579	Negative	
Housing & the built environment	Scale of development	Is the density too high for rural setting?	579	Neutral	
Infrastructure & Access	Access constraints	Access is already poor	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	Traffic and parking would be horrendous	579	Negative	
Infrastructure & Access	Access constraints	Orchard Lane site. NO access, ridiculous, dangerous turning onto High St! Infrastructure not suitable!	579	Negative	
Infrastructure & Access	Access constraints	Village centre developments would cause large access issues	579	Negative	
Infrastructure & Access	Access constraints	Access for 153 houses is just not viable via Orchard Lane	579	Negative	
Housing & the built environment	Scale of development	That density sounds almost like a block of flats - ridiculous. Northern area between 2 drains is a possibility but should not join to Brook Lane (particularly if it creates a circular route). Footpaths to consider also.	579	Negative	
Housing & the built environment	Type/Mix Dwelling type	I do not think "older people housing" should be planted in a site delivering 135 family homes. The older residents would like a peaceful site, not surrounded by families with young children.	579	Negative	
Infrastructure & Access	Access constraints	Orchard is too narrow and congested for access. Huge loss of integral to heart of village green space.	579	Negative	
Environment & Countryside	Open space - Protection	Only green space for dog walking?	579	Negative	
Environment & Countryside	Open space - Protection	Surely some of this land is ancient meadows	579	Negative	
Infrastructure & Access	Access constraints	Access terrible	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	This village is used as a rat run to MK. 250 more cars will create more chaos.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	I find this idea totally unacceptable. The traffic is already congested, it would be impossible to access Orchard Lane/ Wood Road.	579	Negative	
Community facilities	Community wants	Any large development should have to include a benefit to the village. Play area etc	579	Neutral	Playground
Infrastructure & Access	Access constraints	Terrible idea. As is is, traffic issues a nightmare turning into Orchard Lane from High St.	579	Negative	
Infrastructure & Access	Access constraints	Access to Brook Lane or Orchard Lane would be difficult.	579	Negative	
Infrastructure & Access	Access constraints	Stupid idea. How could the area be accessed.	579	Negative	
Other	General	Good idea, I don't think.	579	Negative	
Housing & the built environment	Location	We need to keep some feeling of space in the village. Development on the outside of the village would retain character of the village.	579	Positive	
Infrastructure & Access	Access constraints	Expanding into Orchard Lane would be a mistake. Grow on the OUTSKIRTS of the village will: Minimise disruption, keep congestion down, allow better access in and out of the village.	579	Negative	
Infrastructure & Access	Access constraints	Very narrow along section of Orchard Lane so 579 would be a nightmare!	579	Negative	
Infrastructure & Access	Access constraints	Dreadful access.	579	Negative	
Infrastructure & Access	Access constraints	Relief road from Orchard Lane to Odell Road for new developments.	579	Negative	
Infrastructure & Access	Access constraints	Access is already difficult. Traffic flow would be a huge problem.	579	Negative	

Housing & the built environment	Scale of development	Very small parcels of fronting onto Brook Lane (Between ex houses) and Orchard Lane opposite ex housing.	579	Neutral	
Housing & the built environment	Scale of development	Terrible access and too high density of housing.	579	Negative	
Infrastructure & Access	Access constraints	Access awful.	579	Negative	
Environment & Countryside	Open space - Protection	Would take away open feel of village. Better options.	579	Negative	
Infrastructure & Access	Services (Drainage etc)	Brook Lane. No metallic road and already crumbling from use.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	Too much traffic for Brook/Orchard Lane. 135 houses is ridiculous.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	Awful access road! Would create bottleneck! Plus very high density build.	579	Negative	
Infrastructure & Access	Speeding/Traffic Calming	The road in Orchard Lane is too narrow and would cause unsafe environment for residents of Orchard lane and Wood Road when walking along.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	Orchard Lane cannot cope with the amount of traffic. There needs to be a different access/egress point - Odell Road maybe?	579	Negative	
Other	General	Absolutely ridiculous!	579	Negative	
Infrastructure & Access	Access constraints	Orchard Lane too narrow for more traffic.	579	Negative	
Infrastructure & Access	Access constraints	30 dwellings is too close. Access is narrow.	579	Negative	
Infrastructure & Access	Access constraints	Orchard Lane too narrow for access. Site too centrally placed. Will impact on character of village. Other options seem to make more sense.	579	Negative	
Community facilities	Community wants	Better to use this land for a football field for the village.	579	Negative	Football field
Infrastructure & Access	Access constraints	Too big for the size of the lane.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	Best site for reducing traffic through the village. On right side of village for traffic access to employed routes.	579	Positive	
Infrastructure & Access	Access constraints	The site at the top of Orchard Lane does not make sense. Why choose a site with restricted access (narrow road) a site positioned so centrally will diminish the character of Harrold's centre.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	Orchard Lane is too narrow for any more traffic. The access to the land behind Dickens close leads to a one-car width road. This is unacceptable.	579	Negative	
Infrastructure & Access	Access constraints	Proposed development off Orchard Lane/Brook Lane is absurd given access issues.	579	Negative	
Infrastructure & Access	Access constraints	Concerned with access down Orchard Lane as the road is narrow and major development will cause problems.	579	Negative	
Housing & the built environment	Location	Orchard Lane is not an option as context of historic and listed buildings needs to be protected and preserved.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	Parking in Orchard Lane is a major problem already. Houses will have more cars than parking spaces.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	Access to Orchard Lane/Wood Road, cannot take additional traffic, bad enough as it is without adding more cars/trucks.	579	Negative	
Infrastructure & Access	Traffic congestion/Parking	The large-scale development that has access via Wood Road at the top of Orchard Lane is ridiculous - that would mean around 300 additional cars along a road that is very narrow in parts and would cause accidents.	579	Negative	
Infrastructure & Access	Access constraints	Orchard lane junction dangerous and tight with parked cars, lorries and tractors - any additional housing would need additional access in this area.	579	Negative	
Housing & the built environment	Location	Fairly scrappy piece of land, so I would be up for development	606	Positive	
Community facilities	Community wants	Better idea to build on outskirts of village. Please add a playground!	606	Negative	Playground
Infrastructure & Access	Access constraints	I do not think this site should include land south of the High St due to junction and poor visibility to/from Lavendon direction. It should also not include land east of New Road which incorporates two heavily-used public footpaths.	606	Negative	
Infrastructure & Access	Traffic congestion/Parking	What highway safety issues? Issue is parked cars as there is no off-road parking available.	606	Negative	
Infrastructure & Access	Traffic congestion/Parking	This seems a lot of housing - 150... Congestion would be an issue an detrimental to High St.	606	Negative	
Infrastructure & Access	Access constraints	Access to high St is poor and difficult to get visibility due to levels. Concern at loss of open space used.	606	Negative	
Infrastructure & Access	Traffic congestion/Parking	Priority Farm not a bad option, as it suggests growing out of the centre which would be better for congestion.	606	Positive	
Other	General	Good option in every way.	606	Positive	
Infrastructure & Access	Traffic congestion/Parking	Orchard Lane could not sustain the additional traffic. This would be a monumental mistake. Outskirts are the better option.	606	Negative	
Housing & the built environment	Design etc	This area should be considered as part of the "open space" this is fundamental to the character of the building.	606	Negative	
Environment & Countryside	Open space - Protection	Precious open space - too valuable to waste with more town homes.	606	Negative	
Environment & Countryside	Open space - Protection	It would be a real shame to flatten a 16th century farm (Priory Farm) for the sake of housing. That area of High St is narrow and lots of cars parked on the road.	606	Negative	
Other	General	This is a good option.	606	Positive	
Infrastructure & Access	Speeding/Traffic Calming	Entrance to High St at Lavendon end, traffic far too fast. Need traffic calming and 20mph enforcement.	606	Negative	
Other	General	Good option.	606	Positive	
Infrastructure & Access	Traffic congestion/Parking	Better option in the sense it will create less congestion through the village.	606	Positive	
Environment & Countryside	Open space - Protection	Please keep it as my dog loves being walked there an there is a brilliant conker tree!	606	Negative	
Other	General	Subject to chance/repair liability.	606	Neutral	
Other	General	There is no chance/repair liability on Priory Farm.	606	Neutral	
Other	General	The buildings at Priory Farm seem to be mainly unused and semi-dereck.	606	Neutral	
Environment & Countryside	Open space - Protection	Priory Farm buildings are our active farming. Do you want to eat?	606	Negative	
Other	General	Priory Farm is an active farm and most buildings in use still.	606	Negative	
Environment & Countryside	Open space - Protection	What about Priory Farm home? Protect open space!	606	Negative	
Housing & the built environment	Type/Mix Dwelling type	Small areas are ok for commercial.	606	Neutral	
Infrastructure & Access	Access constraints	Difficult for vehicle access - very tight bends. Floods during winter.	606	Negative	
Infrastructure & Access	Access constraints	Better site for access and preserving character of Harrold itself.	606	Negative	
Other	General	Looks to make much more sense than the others in terms of retaining character of village.	606	Positive	
Housing & the built environment	Location	Looks a good development space close to the village centre - better than most other areas.	606	Positive	
Other	General	We need more routes of communications, not JUST facebook or website. Lots of older people do not use PCs. What about groups of people?	Generic	Neutral	
Other	General	Will this go down the plughole as the last village initiative?	Generic	Neutral	
Other	General	Publicise things in The Bridge, not just facebook. All households have it delivered.	Generic	Neutral	
Other	General	Why isn't this information in The Bridge magazine. Not everyone has facebook	Generic	Neutral	
Other	General	Social inclusion	Generic	Neutral	
Other	General	Placemaking is quite a new term getting attraction	Generic	Neutral	
Community facilities	Community wants	Community health initiatives. Eg Community gym/table tennis. Also help voluntary initiatives like local cinema and art groups.	Generic	Neutral	Gym/table tennis
Other	General	How can we work with other communities, share resources etc	Generic	Neutral	
Environment & Countryside	Open space - Protection	I would like to see an effort to make Harrold a Zero-Carbon community in order to preserve its character and environment for generations to come	Generic	Neutral	
Other	General	Value local people's views	Generic	Neutral	Community events
Community facilities	Community wants	More community event which all age group would be interested in, at realistic times of the day	Generic	Neutral	
Other	General	If the Borough Plan conflicts or overrides the Neighbourhood Plan, who decides? Can the parish appeal to a higher authority?	Generic	Neutral	
Other	General	How much weighting is given to it?	Generic	Neutral	
Infrastructure & Access	Access constraints	Are expert opinions on subjects (eg Road Layouts) available and taken into account?	Generic	Neutral	
Other	General	Legal status of referendum? BBC can take it under consideration and then ignore it	Generic	Neutral	
Other	General	What does "required to take account of it" mean in practice?	Generic	Neutral	
Other	General	What does "BBC would be required to take account of it" mean in practice?	Generic	Neutral	
Other	General	But how much notice will be taken of local villagers' views. How will the infrastructure of the village manage	Generic	Neutral	
Other	General	Some volunteers who end up doing/organising everything? How do you discourage apathy. Inform all villagers, not just by facebook.	Generic	Neutral	
Other	General	How will you get volunteers? It is difficult to get them for any organisation.	Generic	Neutral	
Other	General	How will you get volunteers to be involved and when? Limit on numbers?	Generic	Neutral	
Other	General	How can villagers join the Steering Group? Or will this just be HPC and Borough Councilor?	Generic	Neutral	
Other	General	How do you enlist volunteers?	Generic	Neutral	
Other	General	Where? In The Bridge so everyone can read it - not just facebook/HPC website	Generic	Neutral	
Other	General	Where is this? Can I get a bus there? Not everyone uses the internet.	Generic	Neutral	
Environment & Countryside	Natural features	Support for the Country Park is important, but it appears to be out of area	Generic	Neutral	
Environment & Countryside	Natural features	When defining the area it should have included the Country Park	Generic	Neutral	
Other	General	Do you look at neighbouring Neighbourhood Plans and take into account what these may say or work jointly	Generic	Neutral	
Environment & Countryside	Natural features	Country Park is considered in Odell due to Parish Council boundaries?	Generic	Neutral	
Environment & Countryside	Natural features	Extend area to include Odell Parish and park	Generic	Neutral	
Other	General	I agree with comments about neighbouring parish considerations. If each parish developed up to their boundaries "in isolation" the effect would lead to coalescence	Generic	Neutral	
Environment & Countryside	Natural features	More influence of it involved the country park	Generic	Neutral	
Other	General	How much does HPC liaise with neighbouring parishes (Odell especially). This is important!	Generic	Neutral	
Environment & Countryside	Natural features	Parish should include the Country Park	Generic	Neutral	
Other	Vision Statement/Objectives	Why is the focus on Growth rather than Adapting To Needs And Circumstances. Over history many rural communities have shrunk but failed to adapt to their changing circumstances. Growth should be determined by needs, not an assumption	Generic	Neutral	
Other	Vision Statement/Objectives	Does it have to grow?	Generic	Neutral	
Other	Vision Statement/Objectives	What is Harrold's "Strong sense of place"?	Generic	Neutral	
Other	Vision Statement/Objectives	Very good!	Generic	Positive	
Other	Vision Statement/Objectives	Do not agree with the draft Vision Statement. You cannot respect well-designed growth that sustains local services etc AND protect its rural setting. I would prefer to see the words "Well-designed minimal growth"	Generic	Negative	
Other	Vision Statement/Objectives	"Rural nature and setting"	Generic	Neutral	
Other	Vision Statement/Objectives	"Protecting its rural nature and setting"	Generic	Neutral	
Other	Vision Statement/Objectives	One of the key points is acting on the information you get from villagers today - not just deciding on what HPC want	Generic	Negative	

Other	Vision Statement/Objectives	Suggest adding "whilst maintaining and protecting its historic conservation areas and rural setting.	Generic	Neutral	
Other	Vision Statement/Objectives	Vision Statement only concentrated on Development where NP is much wider than that. I think this should be reflected in VS.	Generic	Neutral	
Other	Vision Statement/Objectives	Assuming that local services are already "sustained" - is this so?	Generic	Neutral	
Other	Vision Statement/Objectives	Maintaining local identity and rural setting is key	Generic	Neutral	
Other	Vision Statement/Objectives	What does "strong sense of place" mean?	Generic	Neutral	
Other	Vision Statement/Objectives	Which "place"?	Generic	Neutral	
Community facilities	Community wants	More countryside activities.	Generic	Neutral	Countryside activities
Other	General	Suitable "centrally located" units (not flats) for elderly, possibly single (widowed) residents would free up larger properties for re-allocation. Accommodation of a sheltered variety but not BPHA!	Generic	Neutral	
Housing & the built environment	Design etc	No more town houses with 3 stories.	Generic	Neutral	
Local economy	Type of development (eg Small bu	How can local trades an businesses/services be involved in future building works?	Generic	Neutral	
Infrastructure & Access	Access constraints	Also need to ensure location is not going to overload the small roads and poor junctions in the village. ie better development of roads out of village.	Generic	Neutral	
Housing & the built environment	Scale of development	Scale of housing must be compatible with existing or proposed infrastructure.	Generic	Neutral	
Housing & the built environment	Design etc	There are ways of being sensitive to conservation and local character but also being modern and sustainable.	Generic	Neutral	
Housing & the built environment	Design etc	Must be "in keeping" but not a pastiche. Diversity of design is part of our historic character, particularly due to smaller developments.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Make a set percentage self-build to stop developer building legoland.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	New developments should have a proportion of genuinely affordable homes or else young people brought up in Harrold will be forced to leave.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	How do we avoid becoming a location for pilgrim housing to fill with socially difficult cases on periphery of borough?	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Need some housing suitable for elderly people who are home-owners - this would free up some large family houses. Suitable accommodation would provide 2 bed flats with some communal areas.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Traffic in Orchard lane can currently speed, busy road. Can't support more on narrow road.	Generic	Negative	
Housing & the built environment	Type/Mix Dwelling type	Single bedroom old people's type chalet bungalow - about 12 to 15.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	We have enough family homes. Any development should be first time and older people.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Need for starter homes and old people's homes, which have good access to village facilities.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Should look at good quality and sustainable housing. Eg high energy-efficiency.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Yes to solar farm.	554	Positive	
Housing & the built environment	Type/Mix Dwelling type	Ensure housing is environmentally responsible.	Generic	Neutral	
Other	General	Has the emergence of Colworth development affected the 50-150 homes required here?	Generic	Neutral	
Other	General	The larger-scale developments would destroy the village - the issues with traffic, road safety etc, would cause a severe detriment to village life.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Be more careful about where social housing is put.	Generic	Neutral	
Housing & the built environment	Design etc	Local identity is key. I would recommend considering the budget of "cheap builds" vs the integrity of the village's character.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	We moved from an area that ended up with large congestion issues from the growth of the school expansion. This could be similar issue with no turning back if careful plans aren't implemented. Please consult parents!	Generic	Negative	
Housing & the built environment	Type/Mix Dwelling type	1. Housing for elderly. 2. Small houses for singles/couples. 3. Traffic concerns on Orchard/Brook Lane.	Generic	Neutral	
Housing & the built environment	Design etc	Is this a new core theme? Hopefully, as some quarters of new builds in Harrold could be from any suburb.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Core objective 1: ok but the only identified housing need is for more appropriate housing for old people - not flats - bungalows for over 60s.	Generic	Neutral	
Other	General	Will the current village envelope be maintained to protect the rural setting of Harrold as the vision statement states. Most new proposed development sites are outside this.	Generic	Neutral	
Housing & the built environment	Design etc	ok for good future development but consider good modern design sympathetic to Harrold's historic core but not a copy.	Generic	Neutral	
Infrastructure & Access	Services (Drainage etc)	Must ensure that infrastructure is in place to support any development before commencing. Transport, drainage, footpaths etc.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	We need a good mix of types of housing - for elderly - for young people etc	Generic	Neutral	
Housing & the built environment	Location	Should be within existing boundaries where possible.	Generic	Neutral	
Environment & Countryside	Sustainable energy	Make new houses as eco-friendly as possible. Solar panels etc.	Generic	Neutral	
Housing & the built environment	Location	Protect all historic and notable buildings in the village centre (heart of the village).	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	What is often forgotten is the need for accommodation for adults with learning difficulties so we have a local base. The existing home in Dove Lane is having to move away - we should provide for and protect these local people.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Harrold needs affordable housing for younger people and families otherwise community will stagnate and die.	Generic	Neutral	
Housing & the built environment	Scale of development	Small pockets of development are better than larger areas.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Would be good to minimise infilling as old streets are narrow and would struggle with extra traffic and parking needs.	Generic	Negative	
Other	General	Any increase in housing will impact on schooling - ensure schools consulted/informed.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Need more affordable homes so local people can afford to stay in village.	Generic	Neutral	
Housing & the built environment	Scale of development	We would happily support small development for the young and retired but feel the larger developments would totally spoil the village and cause major traffic problems.	Generic	Neutral	
Housing & the built environment	Location	New development to be within existing village envelope. Protect surrounding rural landscape.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Provide adequate parking for any development.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Nice to see proposals for elderly people, but we need a facility for people in care. ie Olney/Riseley/Sharnbrook	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Housing/care for elderly residents.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Supported housing for young, local people so they do not have to move away.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Housing for first time buyers and older people that is accessible on foot to the existing village facilities.	Generic	Neutral	
Other	General	Assumes housing development is mandatory - not so.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	More affordable self-build housing.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	More houses for young people (affordable). Also, more bungalows for older people who have limited movement etc.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	More provision for older people and housing for them.	Generic	Neutral	
Environment & Countryside	Sustainable energy	New houses to be super-insulated and incorporate solar panels. Same for business units.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Develop housing for older people and resist turning every bungalow into a 4 bed house.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Sheltered housing for the older generation.	Generic	Neutral	
Housing & the built environment	Vision Statement/Objectives	Should also include a "Design statement" ensuring that development is in-keeping with the style, history and materials that characterise our village. Eg every road off the High t is, and should remain, a no through road.	Generic	Neutral	
Housing & the built environment	Type/Mix Dwelling type	Need affordable homes for younger people otherwise schools will have issues keeping numbers adequate.	Generic	Neutral	
Other	Vision Statement/Objectives	What was/will be the assessment against? Could list eg With respect to... access, current land use etc.	Generic	Neutral	
Housing & the built environment	Design etc	Use materials that last.	Generic	Neutral	
Other	Vision Statement/Objectives	Objective is good but difficult to align with need for high density housing.	Generic	Neutral	
Environment & Countryside	Wildlife	Protection of wildlife sites from any close development.	Generic	Neutral	
Other	General	Empty plots at existing allotment.	Generic	Neutral	
Environment & Countryside	Open space - Protection	Our open spaces must be protected - one of the reasons this village is so great.	Generic	Negative	
Environment & Countryside	Natural features	HOGP is not inside the boundary as the boundary is down the centre of the Odel/Carlton road. We have lots of playgrounds in the village - too many?	Generic	Neutral	
Environment & Countryside	Natural features	Why is the country park not in the scope of the plan?	Generic	Neutral	
Environment & Countryside	Natural features	Country park not in the existing boundary.	Generic	Neutral	
Environment & Countryside	Open space - Protection	Key theme 3: mitigates against "fill-in" development - we are rural because of our green spaces.	Generic	Negative	
Environment & Countryside	Open space - Protection	Access to open countryside and recreational facilities is a high priority.	Generic	Negative	
Environment & Countryside	Open space - Protection	Key theme 3: Fully agree, but how can the green spaces be protected when potential housing estate happens (the larger ones).	Generic	Neutral	
Environment & Countryside	Wildlife	Wildlife corridors are just as important as defined sites, which should not become isolated by encircling development.	Generic	Neutral	
Environment & Countryside	Wildlife	Protect wildlife, ensure plenty of green pockets and corridors.	Generic	Neutral	
Environment & Countryside	Wildlife	Do we know what wildlife we have and therefore what and how it needs protecting?	Generic	Neutral	
Environment & Countryside	Open space - Protection	Want to try to keep some green spaces in the village.	Generic	Neutral	
Environment & Countryside	Open space - Protection	Part of the character of the villages are the fields within the boundaries of it. These must be protected at all costs.	Generic	Negative	
Environment & Countryside	Open space - Protection	Would like to maintain green spaces and feeling of being in countryside.	Generic	Negative	
Environment & Countryside	Open space - Protection	Filling in all the central green spaces will destroy the local identity of the village.	Generic	Negative	
Environment & Countryside	Sustainable energy	Small scale hydro-electric scheme. Is it being done at Sharnbrook mill?	Generic	Neutral	
Environment & Countryside	Wildlife	Start up a local conservation group - work with school etc.	Generic	Neutral	
Other	General	Excellent! Keep to it!	Generic	Positive	
Environment & Countryside	Open space - Protection	Yes! Keep the green belt around Harrold. Until now it has been well-preserved.	Generic	Negative	
Other	Vision Statement/Objectives	This should include a commitment not to destroy the village and countryside feel by cluttering it with too much street furniture - road signs, cameras, yellow lines, and similar "town" or "city" features.	Generic	Neutral	
Other	General	Too many playgrounds already! More use should be made of the playing fields.	Generic	Negative	
Other	General	There are already allotments - can't fill all vacant plots at the moment! Access can be difficult.	Generic	Neutral	
Environment & Countryside	Open space - Protection	Green space within the heart of the village must be protected. Development should be on the periphery.	Generic	Neutral	
Environment & Countryside	Open space - Protection	Use and value open spaces. 100% support sustaining and expanding these as promoting further conservation initiatives.	Generic	Neutral	
Environment & Countryside	Sustainable energy	Bring back the solar farm!	554	Positive	
Environment & Countryside	Open space - Protection	Keep the spaces within the village - important for children to be able to roam and explore. Any development should be further out with supporting infrastructure where necessary.	Generic	Neutral	
Environment & Countryside	Open space - Protection	More work needs to be done to reduce flooding on proposed sites and any run-off from near buildings.	Generic	Neutral	
Environment & Countryside	Open space - Protection	Maintain the existing village envelope to protect areas where green space already exists.	Generic	Neutral	

Environment & Countryside	Trees	Hope we can protect lime trees round kckens close and field beside. Important to keep green spaces within the village.	Generic	Neutral	
Environment & Countryside	Open space - Protection	How can the space and countryside be protected with the ambitions for extensive new housing?	Generic	Neutral	
Community facilities	Community wants	Open spaces need to include adequate leisure facilities - which are already poor in the village	Generic	Neutral	Leisure activities
Environment & Countryside	Open space - Protection	How does the new development contribute to open spaces?	Generic	Neutral	
Environment & Countryside	Sustainable energy	Solar power should be generated per household. Green spaces, where people walk, need protecting.	Generic	Neutral	
Environment & Countryside	Open space - Protection	We both love the open spaces and as senior citizens use them often.	Generic	Neutral	
Local economy	Services	Can you make a hub? Eg rural sustainable services etc	Generic	Neutral	
Local economy	Type of development (eg Small bu	Yes to small business units and small workshop units for artists/local crafts people.	Generic	Positive	
Local economy	Type of development (eg Small bu	Limit housing to small scale self build only. Commercial (small scale) required to redress imbalance in village.	Generic	Neutral	
Local economy	Impact	Value local people and local jobs.	Generic	Positive	
Local economy	Type of development (eg Small bu	Yes to smaller business units.	Generic	Positive	
Local economy	Impact	Harrold, unlike some rural communities, is growing, thriving and consequently people want to live here and work here. This NP is vitally important so we must all get involved.	Generic	Neutral	
Local economy	Impact	Use local business and trades as a first choice.	Generic	Neutral	
Other	General	Make sure developers' promises for getting planning permission get fulfilled. Eg Roman Paddock business units now an eyesore.	Generic	Neutral	
Infrastructure & Access	Services (Drainage etc)	Good broadband coverage and mobile phone provision essential to encourage small businesses.	Generic	Neutral	
Local economy	Type of development (eg Small bu	Opportunity for small local businesses eg office space (affordable).	Generic	Neutral	
Local economy	Type of development (eg Small bu	More commercial property	Generic	Neutral	
Infrastructure & Access	Services (Drainage etc)	Improved mobile phone coverage and broadband.	Generic	Neutral	
Infrastructure & Access	Services (Drainage etc)	Good broadband key for small business.	Generic	Neutral	
Infrastructure & Access	Services (Drainage etc)	More sustained broadband.	Generic	Neutral	
Infrastructure & Access	Services (Drainage etc)	Mobile phone coverage needs amending and improving.	Generic	Neutral	
Local economy	Impact	We should have some sort of business incubation site.	Generic	Neutral	
Local economy	Impact	Encourage employment within village: High quality broadband, positive support for small business, local facilities	Generic	Neutral	
Local economy	Type of development (eg Small bu	Is there an older property that can be developed as a business incubator?	Generic	Neutral	
Housing & the built environment	Design etc	Why are so many aspects of design and development focused on cars? Will this still be relevant in 50/100 years?	Generic	Neutral	
Environment & Countryside	Sustainable energy	Wind turbine	Generic	Neutral	
Other	Vision Statement/Objectives	Good objective but no substance as to how this will be achieved!	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Yellow lines will just force traffic parking further out of centre. Issues with school pickup will get worse if school site grows commensurate with new housing growth.	Generic	Negative	
Infrastructure & Access	Traffic congestion/Parking	Car parking is a must for consideration.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Parking provision in new development important.	Generic	Neutral	
Community facilities	Community wants	Public transport facilities remain poor.	Generic	Neutral	Improved buses - MK and Tra
Community facilities	Protecting existing facilities	Need to ensure infrastructure needs eg schooling are fully taken into account.	Generic	Neutral	
Infrastructure & Access	Footpaths/Cycleways	Would be good to leave walking/cycling paths from new developments to shops and school - discourage driving and encourage walking.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Parking provision at school drop off/pick up a nightmare.	Generic	Negative	
Infrastructure & Access	Traffic congestion/Parking	Traffic is currently brought to a standstill at school closing time. Can anything be done about this?	Generic	Negative	
Community facilities	Community wants	What about public transport - buses we are lucky to have a reasonable bus service but no links with other services such as going to the rail station - plus possible link with Lavendon to link with buses to MK and Northampton.	Generic	Neutral	Improved buses - MK and Tra
Community facilities	Protecting existine facilities	Harrold Bridge needs to be preserved. Restriction on weight.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Roads get blocked by buses and cars - get more regular wardens to check/issue tickets.	Generic	Negative	
Infrastructure & Access	Traffic congestion/Parking	People will still drive to the school! Congestion will be increased for all the villagers who use the High St.	Generic	Negative	
Infrastructure & Access	Speeding/Traffic Calming	Speeding is not an issue. Inappropriate speed and inconsiderate driving and parking is. No amount of signage will improve manners!	Generic	Neutral	
Infrastructure & Access	Speeding/Traffic Calming	Speed of cars on the High St needs to be controlled especially near the URC.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	School is a major issue. They wish to expand without any thought of effect on the village. Their aspirations must be compatible with the infrastructure needs.	Generic	Negative	
Environment & Countryside	Sustainable energy	Solar panels on top of the buildings.	Generic	Neutral	
Infrastructure & Access	Speeding/Traffic Calming	Pedestrian crossing to park.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Changes to the school from 3 to 2 tier may reduce the amount of traffic in the village.	Generic	Neutral	
Community facilities	Community wants	Buses and train timetables should be joined up - no buses to MK!	Generic	Neutral	Improved buses - MK and Tra
Infrastructure & Access	Traffic congestion/Parking	Improved traffic management - would like to hear how this will work. Everything in the last ten years has done nothing or just moved the problem!	Generic	Neutral	
Environment & Countryside	Open space - Protection	Water run-off from hard surface developments. Can Brook and Culverts cope?	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Look at alternative transport. Eg cycling, car share.	Generic	Negative	
Infrastructure & Access	Traffic congestion/Parking	How will you address larger numbers at school - more traffic problems.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Consideration should be given to an increase in infrastructure demand, and improvements made for it.	Generic	Neutral	
Infrastructure & Access	Access constraints	No more access onto middle part of High St.	Generic	Neutral	
Infrastructure & Access	Speeding/Traffic Calming	Traffic entering village from Lavendon end and going forwards it's far too fast. Need for 20mph limit and traffic calming, road humps etc	Generic	Neutral	
Infrastructure & Access	Speeding/Traffic Calming	Agree with comment about traffic entering from Lavendon past 30mph and back	Generic	Neutral	
Infrastructure & Access	Access constraints	What about road access through the village? How will this be improved with xx additional vehicles requiring access?	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	All new-builds should ensure parking for at least 2 cars.	Generic	Neutral	
Community facilities	Community wants	Why no public transport to MK? For work and shopping.	Generic	Neutral	Improved buses - MK and Tra
Infrastructure & Access	Traffic congestion/Parking	More traffic, still only one bridge.	Generic	Negative	
Infrastructure & Access	Speeding/Traffic Calming	Speeding by rat-runners is a real problem! They don't observe new 20mph limit.	Generic	Negative	
Community facilities	Community wants	Better public transport. Interchangeable tickets between the 2 bus companies.	Generic	Neutral	Improved buses - MK and Tra
Other	General	What join-up is there with Odell PC which neighbours Harrold?	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Inconsiderate parking becoming a bigger issue than speeding!	Generic	Negative	
Infrastructure & Access	Speeding/Traffic Calming	Speeding is an issue, particularly at weekends when motorbikes and cars come over Harrold bridge and rush up the High St or Odell road.	Generic	Negative	
Infrastructure & Access	Speeding/Traffic Calming	Speeding definitely needs to be addressed.	Generic	Negative	
Infrastructure & Access	Speeding/Traffic Calming	Speeding is an issue.	Generic	Negative	
Infrastructure & Access	Traffic congestion/Parking	Let theme 2: Yes, totally agree as long as the infrastructure does what it's supposed to do - eg address congestion and improve safety.	Generic	Positive	
Infrastructure & Access	Traffic congestion/Parking	Is it not possible to provide suitable off-street parking as the centre of Harrold is fully developed.	Generic	Neutral	
Community facilities	Community wants	Any chance of getting safer pedestrian crossing over the bridge to Carlton.	Generic	Neutral	Pedestrian crossing to Carlton
Infrastructure & Access	Traffic congestion/Parking	Inconsiderate parking and increasing traffic is making the village more dangerous as it is!	Generic	Negative	
Housing & the built environment	Location	Nothing outside current village boundary. No farm land, must be good access.	Generic	Neutral	
Other	General	Schools to advise village in advance when early closure days, so improve communication and frustration of negotiating High St.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Stop the road blocks at school time - make the kids walk and parents.	Generic	Negative	
Community facilities	Community wants	Safer pedestrian/cycle crossing off the Ouse should be a priority!	Generic	Neutral	Pedestrian crossing to Carlton
Infrastructure & Access	Traffic congestion/Parking	Parking! Butchers/Mumtjac already dangerous.	Generic	Negative	
Community facilities	Community wants	Harrold bridge: 1. Ancient monument 2. Needs weight limit restriction immediately. 3. Eventually new bridge - new location.	Generic	Neutral	Bridge weight restriction
Infrastructure & Access	Traffic congestion/Parking	High St congestion! Schools parking! Flooding/water management if more building.	Generic	Negative	
Infrastructure & Access	Speeding/Traffic Calming	To have proper traffic calming at entrances to the village and a 20mph limit throughout.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Provide safe parking areas at the edges of the village for children to be dropped off to walk to school, with parents if necessary.	Generic	Neutral	
Infrastructure & Access	Speeding/Traffic Calming	30mph limit would be more appropriate. 20mph limit is effectively unenforceable. Potentially a relief road for the High St.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Need to look at drop off parts for school - what is effect when becomes a primary?	Generic	Neutral	
Infrastructure & Access	Speeding/Traffic Calming	Odell Road from Little Odell towards Hinwick has many dangerous bends. Traffic goes too fast. Unsafe access by any development.	Generic	Negative	
Infrastructure & Access	Speeding/Traffic Calming	Crossing Harrold bridge on foot is hazardous. Can't the lights be altered to give an extended crossing for pedestrians.	Generic	Neutral	
Infrastructure & Access	Speeding/Traffic Calming	Speeding through the village is an issue - will 20mph restriction zone be fully implemented soon?	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	How will you make people walk or cycle? They will do whatever they do at the moment!	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	Thought to be given to improve safety of cycling in an effort to encourage less car use for short journeys.	Generic	Neutral	
Infrastructure & Access	Traffic congestion/Parking	New houses have space for one or two cars. Many young families have 3 or more when older children start work and there is insufficient parking.	Generic	Neutral
